

Initial state

Later observations

Further observations

Natural drift only

Dispersed initial observations

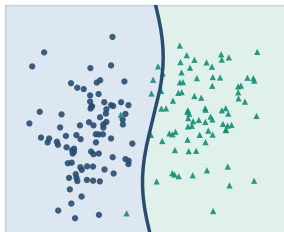

Class B shifts and spreads

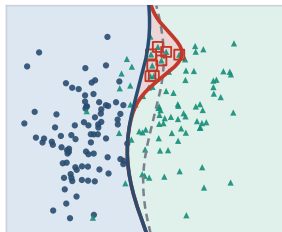

Boundary follows the drift

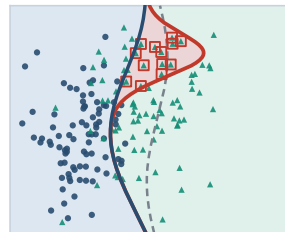

Natural drift + poisoning

Same initial observations

A separate local bend develops

Natural shift + a new distortion

● True class A

▲ True class B

□ Corrupted label

--- Initial boundary

— Natural-drift boundary

— Poisoning-influenced boundary

Red band: additional distortion. Matched observations; illustrative boundaries, not fitted results.
